Rockville, MD 20852

January 5, 1984

Dear Bill:

The following questions relate to the Request for Proposals to Transfer of the United States Land Remote Sensing Program to the Private Sector, issued January 3, 1984. These questions are submitted for response at the preproposal conference January 10, 1984. We may be submitting additional questions before the deadline as well.

1. Page VII.8-3: What does "Government-developed land observation system" mean--does that term refer to the Landsat 4/D' system, or the commercial follow-on system or to both?

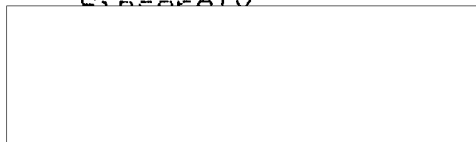

STAT

2. Will the remainder of the NASA Policy Directive on TDRSS use (Attachment A to NMI 8410.3) be provided, and will it include cost information on TDRSS use?

STAT

We commend the SEB on the vast improvements in the clarity of the final RFP compared with the draft. We look forward to the preproposal conference to further explain those areas which are still unclear.

Sincerely,

STAT

Manager,
Program Development
